

METALFORMS
A TransTech Company

Heat Exchanger & Vessel Fabrication & Services

- Shell & Tube Heat Exchangers Built to **TEMA** standards
- Custom **ASME** Fabrication
- Maintenance & **R-Stamp** Repair

Fabrication Specialists

**Delivering Reliability
& Performance**

Metalforms has delivered the highest quality fabricated solutions to process industry owner operators and EPC's for over five decades. Our highly trained and experienced in-house **chemical, mechanical, and industrial engineers** design optimal heat transfer solutions for some of the most difficult process challenges. Our capabilities span an extensive array of specialty metals, including carbon steel, stainless steel, Hastelloy and other nickel alloys—and more.

Shell & Tube Heat Exchangers

- ASME & TEMA Standards
- API 660, 661, 605
- NACE

ASME Fabrication

- Pressure Vessels
- Trayed & Packed Towers
- R-Stamp Repair
- Reactors
- Distillation Columns
- Process Piping

*Optimize
Performance
& Uptime*

Maximize ROI

Industrial Services

Faster Turnarounds

Whether you have a planned—or unplanned—shutdown, time equals money. Metalforms has the capacity and capabilities to solve your heat exchanger issues and get your plant back online at unmatched speed, including **24-7 emergency repairs.**

Heat Exchanger Repairs

You can rely on Metalforms' expert teams to **rapidly diagnose and repair** your heat exchangers for both common and highly complex issues, including:

- Gasket surface repair
- Weld repairs
- Weld build-up & re-machining
- Replacement components
- Repairs to shell & channel components
- Coating & paint application

Strip & Retube

Our seasoned teams can strip and retube all TEMA types of shell & tube heat exchangers—as well as TEMA, ASME, or API air coolers—and our quality control inspectors can work with you to advise of any additional needed repairs.

Replacement Parts

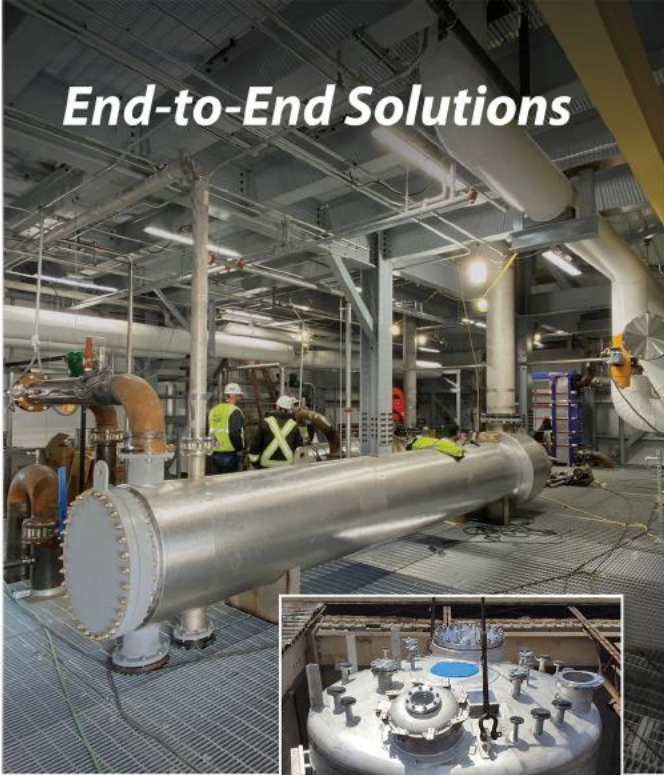

Extend the life of your heat exchanger with our high quality replacement parts!

New **tube bundles, shells, and channels** can be fabricated ahead of scheduled outages saving you significant time and money.

Our industry-leading onsite **machining & drilling** capabilities ensure fast turnaround of the highest quality components for all your project needs—and emergencies.

End-to-End Solutions

Solutions Across the Plant Lifecycle

As part of the TransTech family of companies, we're able to leverage **fabrication and field services capabilities from locations across the U.S.**—giving us the ability to deliver unmatched quality, responsiveness, and speed.

TransTech's specialized teams work individually or jointly, based on customer needs, to deliver comprehensive **engineering, fabrication, construction, maintenance, and operations** projects nationwide and abroad. Contact us today to learn more: **409-842-1626**
